

CASE STUDY HYBRID INSULATION

TIMBER FRAME HOUSES

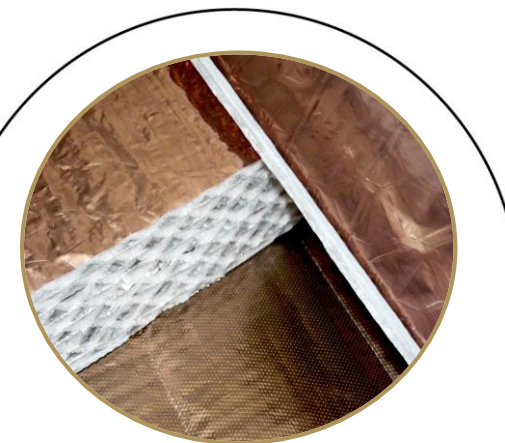

TIMBER KIT SOLUTIONS

CLEANLINESS, EASE AND THERMAL EFFICIENCY SWING THE INSULATION DEAL FOR TIMBER FRAME SPECIALIST

A Shropshire timber frame specialist, Timber Kit Solutions, which builds around 150 units a year, says the three products in the Hybrid range 'tick all the boxes' and is doing its utmost to steer customers towards choosing that as their preferred insulation system.

"We specify it wherever possible – its thermal performance is excellent, it is cost effective and there is no dust when cutting it. Plus, there are no itchy fibres which can be unpleasant to the skin. We also get excellent customer support and technical advice when needed".
